Summary

I'm a front end developer with around 5 years of experience I've worked on a lot of different kind of projects with different technology stacks I've worked alone and worked in teams with other front end developers Worked in a fast paced agile environments with short build sprints Always committed, always trying to improve myself and improve the work environment around me Always welcoming new technologies I never hesitate to support my colleagues and my team members and always courage them and my self to share knowledge with each other I'm also fascinated with everything related to the front end and actually I love what I do and my greatest joy ever is to see a website I built functioning beautifully and interactively. Always curious about everything that is new and modern.
